Sluyter and COVID-19 March 18th, 2020

Like so many of you, we have spent the last several days and weeks learning about the coronavirus (COVID-19) and how it is impacting our world. For Sluyter Company Ltd, that means understanding how it affects our employees, customers, their families and communities, and then making the necessary adjustments to our work and operations.

- Our plant is open today...we are here to support you with inventory, service and people.
- Our employees have always been required to adhere to our procedures in place when producing and handling all manufactured product in our facility, which includes wearing disposable gloves.
- Any employee who show any signs of a mild cough, low fever or any other sign of illness will be instructed to stay home and self-isolate for 14 days.
- We have not had any employee return from travel in the past 4 weeks.
- We are promoting regular and thorough hand-washing in addition to using hand sanitizing stations.
- We have restricting the flow of visitors, (i.e. vendors) to our offices and plant.
- We have implementing heightened safety and cleanliness standards in our facility.
- We have issued social distancing guidelines. We are encouraging all employees to refrain from any hugging, hand-shaking and/or other forms of social interaction that could spread the virus, and to keep a safe distance from each other at all times.
- We are preparing contingency plans on how to support you in the event of temporary business closures.
- We are providing regular guidance to our employees on COVID-19 symptoms and preventative measures.

We will work to provide you with timely communication on changes, locally and nationally (if necessary) To monitor our communication, please visit our website www.sluyter.com.

At this time, we are continuing regular operations, are closely monitoring this evolving situation and are basing our future actions and decisions on recommendations from the Public Health Agency of Canada and relevant authorities. Let us all work together in keeping ourselves and the community safe.

Take care,

Sol Buck
President
