

FABRIGARD

WATER AND STAIN REPELLANT

DESCRIPTION

FABRIGARD is a water and stain repellent specially formulated to protect fabric fibres from stains, water, dirt, smoke and clinging odours. FABRIGARD acts as an invisible barrier that extends the life of fabrics by keeping them looking new longer. Spills and soiling on surfaces protected with FABRIGARD can be easily cleaned.

APPLICATIONS

- Upholstered furniture, cushions and automotive interiors.
- Carpet, mats, area rugs and drapes.
- Outerwear, hats, ties, handbags, luggage and leatherwear.
- Canvas, canopies, tents, awnings and umbrellas.

SPECIAL FEATURES

FABRIGARD repels water and prevents staining – Protects each individual fabric fiber from water and stains. Soils and moisture remain on the fabric surface to allow for easier, faster and more efficient cleaning. Also protects from mildew, smoke and odours.

FABRIGARD will not affect colors or textures, or promote shrinking – Will not cause yellowing, color fading, colour changes, brownouts, texture changes or shrinking. Will not affect the “breathability” of fabrics.

FABRIGARD helps to resist wear – Treated fibers are up to 60% more resistant to wear and abrasion, which promotes longer fabric life. Also reduces sun fading.

FABRIGARD is easy to use – Bulk product can be applied with conventional spray equipment, without clogging concerns. Also available in aerosol cans. No mixing, pre-measuring or diluting required. Can be used year round, in variable climatic conditions.

FABRIGARD is extremely versatile – Can be applied on virtually every type of fabric including cotton/polyester blends, silk, satin, canvas and leather.

HOW TO APPLY

Read and follow all instructions on container labels. Hold aerosol can or spray gun approximately 20 cms. from the application surface and spray from side to side in a sweeping motion. Avoid excessive wetting, since light applications of product provide excellent protection. It is extremely important to test all fabrics prior to application and ensure colour fastness. Apply in well-ventilated areas.

COVERAGE

Furniture – 4 litres of product will protect approximately 8 to 10 sofas, or 15 upholstered arm chairs, or 10 to 15 love seats. Actual coverage may vary by application.

Carpet – 4 litres of product will protect approximately 125 square meters of low profile carpet, or 105 square meters of medium profile carpet, or 84 square meters of high profile carpets. Actual coverage may vary by application.
