

LEATHER-CARE

VINYL & LEATHER CONDITIONER

DESCRIPTION

LEATHER-CARE revives, restores and protects leather and vinyl in one smooth process -with a perfect two-in-one combination - **cleans and conditions**. While most leather cleaners merely remove surface dirt, LEATHER-CARE cleans into the deepest crevices naturally found in leather and vinyl. It conditions as it cleans, leaving the leather and vinyl soft and pliable, to protect against drying and cracking. The fast drying, easy-to-use formula results in quick absorption. After application, the leather or vinyl will have an attractive natural satin luster and a natural aroma.

APPLICATIONS

- Automotive interiors, boats and bikes
- Home and office furnishing
- Leather clothing articles such jackets, coats, vests, boots, and belts
- Handbags and briefcases.

SPECIAL FEATURES

- Contains a UV inhibitor to resist fading, discoloration and cracking
- Leaves no oily residue

HOW TO APPLY

Read and follow all instructions on the container label. Hold aerosol can approximately 20 cms. from the application surface and spray from side to side in a sweeping motion. Rub gently into leather using a microfiber or terrycloth pad. Wipe down area with a clean towel. It is suggested that you treat all leather and vinyl items at least three times a year to keep them looking vibrant for years of service.
