

SILICONE C-20

THREAD LUBRICANT

PRODUCT DESCRIPTION

Silicone C-20 reduces chatter and heat build up by eliminating friction and static electricity. It prevents yarn fraying and reduces thread breakage. Silicone C-20 is an odourless solvent based formula, which may be applied by dipping spools directly into the lubricant or with a thread lubricator box. The thread will remain moist during handling but will evaporate without leaving any residue.

PROPERTIES

APPEARANCE:	Clear (Water-like)
NON-VOLATILES:	5%
FLAMMABILITY:	Combustible
ODOUR:	Almost odourless
SOLVENTS:	Aliphatic Hydrocarbon
SPECIFIC GRAVITY:	0.76 – 0.78 @ 23°C
EVAPORATION RATE:	Less than 0.1 (nBuOAC=1)
SHELF LIFE:	Unlimited, if stored in a closed container at room temperature
